SAVE A LIFE TOUR COMES TO UNA

A UNA student “drives drunk” in a drunk driving simulator that familiarizes people with how quickly an automobile wreck can happen and how out of control a drinking driver is. The program, which numerous students tried driving today, is sponsored by the Save A Life Tour. All dashboard, steering, braking and acceleration functions work and the driver has an almost-180 degree view, yet with the built-in simulations the driver quickly realizes that he or she is not really in control of the “vehicle.” (Photo by Bill Jarnigan)
